

Invasive Plant Removal

[ShareThis](#) [1]

July 28
Friday

On Friday, July 28th, QOC will be participating in an Invasive Plant Removal work day. The group will be meeting at the **McKeldin Area of Patapsco Valley State Park, in Parking Lot A**, which is directly beyond the ranger station at the park entrance. The work day will start at 9:00am and end at noon. Please bring drinking water, sturdy work gloves and dress for pulling up plants in the woods. If you are able to attend on the 28th, please contact me (details below) to confirm your attendance and please make sure to include your name. I will need to give the ranger an advance count, so they can make sure they have a sufficient number of tools for our group.

Jody Landers, QOC President
