COURSE NOTES:

Bob has brought a highly skilled team together to present the materials using a systematic approach to teaching and coaching orienteering. His in-depth and broad involvement and his intimate familiarity with the sport enabled his team of instructors to apply a common, worldwide language to understanding the sport, based on a logical and systematic progression. The skills and techniques development scheme makes good sense; is easily taught and understood; and has the potential to revolutionize the instruction of orienteering far beyond the borders of the USA.

In 2013, along with Chuck Ferguson, Bob co-authored a comprehensive guide to the sport entitled "Discovering Orienteering", which was published in cooperation with Orienteering USA. The royalties from the sale of this book will benefit American orienteering for decades to come. His Team of qualified instructors are dedicated to raising the level of proficiency across the US, and we are grateful that they have volunteered to lead this.
